

# ELEGANCE SQUARED MOSAICS POLISHED

| QUALITY CHARACTERISTICS                                                                                                   | NORM            | STANDARDS                                                     | RESULT     |
|---------------------------------------------------------------------------------------------------------------------------|-----------------|---------------------------------------------------------------|------------|
|  <b>Water absorption of the body</b>     | ISO<br>10545-3  | $\leq 0.5\%$                                                  | Conformity |
|  <b>Breaking strength</b>                | ISO<br>10545-4  | $\geq 35 \text{ N/mm}^2$                                      | Conformity |
|  <b>Abrasion resistance</b>              | ISO<br>10545-7  |                                                               | PEI 4      |
|  <b>Frost resistance</b>                 | ISO<br>10545-12 | No samples must show ruptures or noticable surface alteration | Conformity |
|  <b>Chemical resistance</b>              | ISO<br>10545-13 | No samples must show visible signs of chemical attack         | Conformity |
|  <b>Thermal shock resistance</b>         | ISO<br>10545-5  |                                                               | Conformity |
|  <b>Dynamic coefficient of friction</b> | BOT<br>3000E    |                                                               |            |
|  <b>Slight Variation</b>               | See Below       |                                                               |            |

V1

Uniform appearance

V2

Slight Variation

V3

Moderate Variation

V4

Substantial Variation

FOR THE BEST PRODUCT LAYING RESULTS, MATERIAL FROM AT LEAST THREE BOXES SHOULD BE MIXED

*The polished finish is recommended for wall coverings or for the floors of residential bathrooms. Specifically, floor coverings in this material must not be subjected to excessively heavy traffic and must never be in direct contact with outdoor areas. As is often the case with natural stones, any spots on the surface or any unevenness in shine are typical characteristics of the product, deriving from the process used.*
